## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 15 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurnik (US 6,272,364) as modified by Hiroi et al (US 5,745,362)

Kurnik discloses in column 23, lines 34-58 a method of obtaining the blood glucose concentration of a user, generating commands through the use of a controller, infusing a liquid based of the controller commands, and estimating a hypoglycemic glucose excursion.

Kurnik discloses the claimed invention except for the controller being a bilinear PID controller. Hiroi et al teach that it is known to use a PID controller as set forth in column 3, lines 3-21 to provide a more accurate control system. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the method as taught by Kurnik with a bilinear PID controller as taught by Hiroi et al, since such a modification would provide the method with a more accurate control system.

## Response to Arguments

1. Applicant's arguments with respect to claims 16 and 32 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 10/816,021 Page 3

Art Unit: 3767

2. Applicant's arguments, see Response, filed 3/17/2006, with respect to claims 15 and 31 have

been fully considered and are persuasive. The objection of claims 15 and 31 has been withdrawn.

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Catherine N. Witczak whose telephone number is (571) 272-7179. The examiner can

normally be reached on Monday through Friday, 8-5 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin

Sirmons can be reached on (571) 272-4965. The fax phone number for the organization where this

application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained

from either Private PAIR or Public PAIR. Status information for unpublished applications is available

through Private PAIR only. For more information about the PAIR system, see http://pair-

direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
